

2022 Shanks Workshop on Mathematical Aspects of Fluid Dynamics

Vanderbilt University, February 19-20, 2022

Sponsored by
the Shanks Endowment
the National Science Foundation
and Vanderbilt University

Speakers:

Yu Deng (University of Southern California)
Vera Mikyoung Hur (University of Illinois Urbana-Champaign)
Mihaela Ifrim (University of Wisconsin Madison)
Mihaela Ignatova (Temple University)
Maxim Olshanskii (University of Houston)
Sohrab Shahshahani (University of Massachusetts Amherst)
Konstantina Trivisa (University of Maryland College Park)

Organizers:

Leonardo Abbrescia, Marcelo Disconzi, Gieri Simonett, Jared Speck (Vanderbilt)

Aim: This workshop will provide an opportunity for the dissemination and discussion of recent results and new techniques in the study of partial differential equations related to fluid dynamics. In particular, the workshop's participants will benefit from the interdisciplinary make-up of the group of speakers which incorporates researchers working on theoretical, numerical, and applied aspects of fluid dynamics.

Financial support: Limited financial support is available for young researchers and researchers of underrepresented groups. The deadline for applying is January 7, 2022. See <https://my.vanderbilt.edu/shanksfd/support-request/>
